QuikPay™

The Easy Way to Pay

The QuikPay product line is a convenient, “cashless” hardware and software solution for the self-service car wash market. The controllers are “standalone”, which means that they can easily be integrated into existing equipment or new construction without having to run any network cable or conduit to other locations within your building. All that is needed is a power source of 12-24 VAC or VDC. Your customers use either a pre-paid or billing Key to operate the equipment.

The following are just some of the highlights and features of the QuikPay system:

➤ QuikPay™ Hardware

- Controller Types:
 - **Continuous** - used on self serve and vacuum equipment. Starts equipment while decrementing value continuously from Key at predetermined intervals (set by owner).
 - **Unit** - used on automatic car wash equipment. Value is decremented by the amount set for a specific button on an auto-cashier. After value has been decremented a signal is sent which allows the machine to start.
- **KeyLink™ II Reader** - connects to PC serial port. Transfer data from software to Keys.
- **Admin & Export Keys** (*Gray & Black 256K-bit Keys*) - for programming and retrieving transaction data from individual remote QuikPay controllers.
- **User Keys** (*Red, Yellow, Green & Blue 1K-bit Key*) - hold unique customer identification numbers and value on Key.

➤ QuikPay Software

- **Key Manager** - used for setting up location, controller and user information.

Key Manager software– Main screen

Key Account Manager – used for invoicing customers and reporting.

➤ QuikPay™ Advantages

- A Simple Key interface. Everyone knows how to use a Key.
- QuikPay Keys are designed to be durable.
- Convenient for your customers and your staff. With the Keys, there is no more fumbling for quarters. Once the Key is inserted into the equipment, your customer can wash for as long as they wish without interruption. Your employees now use the Key instead of cash to clean and maintain your car wash.
- QuikPay can increase customer loyalty and encourage more wash use.
- A Unique marketing tool. “The Key to Success.™”. The Key is always at hand and in front of your customer.
- Fleet accounts can easily be maintained. Keys can be issued for each vehicle or employee in a fleet account. The Key Account Manager software prints out each transaction with a time/date stamp and user name.
- Standard reports can be generated by Group, User, Date, Controller or Price. Data can be exported in a .csv (comma separated format) file. The csv file can be opened using a spreadsheet program such as Microsoft Excel where the owner can manipulate the data to their liking.
- QuikPay Software uses a Microsoft Access database engine, but does not require the customer to purchase a separate copy like some competitive products.

BENEFITS TO CARWASH OWNERS & CUSTOMERS

- ✓ Rugged Keys – Resilient to ESD, dirt and moisture.
- ✓ Convenient – Prepay or decrement cash balance.
- ✓ Reduce Employee Theft – Cashless!! Give employees Keys, not cash for maintenance purposes.
- ✓ Customer Spends More – Will completely wash the vehicle, not race to beat the time left on the machine.
- ✓ Fleet Friendly – Give the vehicles Keys, not cash. Monthly consolidated billing option.
- ✓ No Bank Charges – Unlike credit card options.
- ✓ Creates customer loyalty.
- ✓ Simple to Install – No cables or network to setup.
- ✓ Repeat Key and peripheral business from carwash customers.
- ✓ Lower Cost compared to other cashless carwash systems.
